

# COVID-19 Vaccine Allergy Case Registry

We have created the COVID-19 Vaccine Allergy Case Registry as a community-wide effort to collect and share case reports on COVID-19 vaccine-related hypersensitivity reactions.

We are collecting:

- ▶ Cases of **immediate** and **delayed** vaccine reactions
- ▶ Cases of **anaphylaxis**
- ▶ **Unique** allergy cases
- ▶ **Allergy testing** and vaccination outcomes

These case reports are collected from:

- ▶ **healthcare professionals** who wish to share their reports of vaccine hypersensitivity

The case report form:

- ▶ A secure **online survey**
- ▶ It will take approximately **10 to 20 minutes** to complete
- ▶ You can save your work and **finish at your own pace**
- ▶ Only **de-identified information** and **photos** will be collected. Information will be kept strictly confidential.

If you are interested in contributing to this study, please submit the case report **here**: [allergyresearch.massgeneral.org](https://allergyresearch.massgeneral.org)

The information is only shared with healthcare professionals and researchers for managing and improving patient care and for expanding current knowledge on COVID-19 vaccine allergy.

## Our Goals

**IMPROVING  
CLINICAL CARE**

Sharing knowledge on COVID-19 vaccine reactions

**PROMOTING  
PUBLIC HEALTH**

Promoting improved care & management of COVID-19 vaccine reactions

**ENABLING  
SCIENTIFIC  
DISCOVERY**

Advancing knowledge on COVID-19 vaccine reactions
